

Company Profile & Products

IF YOU CAN IMAGINE IT WE CAN CREATE IT

WEB: negg.group

WE ARE A RESEARCH-BASED COMPANY FOCUSED ON
CYBER INTELLIGENCE
AND **CYBER SECURITY**

In negg® Group we strongly believe that **innovation** and **safety** are the two keywords of the future business market.

We provide **high-quality products and solutions** to enterprises and institutions worldwide through leading ICT innovation.

We aim at creating **high standards security software** to help companies to prevent ransoms requests, information leakage and data loss. Every challenge allows us to go beyond any limit and customers satisfaction is our best reward.

Roadmap

2013

COMPANY SET-UP

2016

FIRST CORE PRODUCT LAUNCH

Completion of the development of the first cyber security core software technology

2017

FIRST SUCCESSFUL PARTNERSHIP

First sizeable partnership signed, which enabled negg to give a great boost to cyber security business in Italy

2018

EXCELLENCE AWARD ACHIEVED

negg is named winner of "Le Fonti Innovation Awards" as excellence of the year in information security innovation and leadership

2018-19

FOCUS ON THE ITALIAN MARKET TO

- Establish an effective business model
- Develop reliable technology
- Create a high reputation

2023-25

INNOVATION & EXPANSION

- Consolidation of international client's portfolio and core business activities
- Innovation through creation of new business unit with selected partners
- Business activities expansion through organic and inorganic growth

2023

FT1000, MARCH 1 2023

negg Group at position 565/1000 in the ranking of Europe's fastest growing companies

2022

BEST INNOVATIVE SME FOR MANAGEMENT PERFORMANCE AND FINANCIAL INTEGRITY

negg received the Highest Financial Report Honor on the occasion of the 41st event of the Industria Felix Award

ITQF (ISTITUTO TEDESCO QUALITÀ E FINANZA), NOVEMBER 29 2022

negg Group at position 125/800 for exceptional CAGR during 2018-2021

2021

INTERNATIONAL GROWTH

Start of export operations within three area's:

- European Union
- APAC
- Africa

2020

SECOND CORE PRODUCT RELEASE

Drop of the second cyber security core proprietary technology

INTERNATIONAL KICKOFF

negg starts its expansion abroad. Contract signing with a major international customer: negg lays the foundations for its international expansion

Our Solutions

Intelligence

ONLY FOR GOVERNMENT

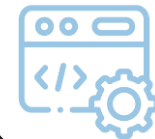

Our Proprietary Intelligence Solutions consist of powerful software suites designed for security investigators. These systems provide solutions for homeland security, counterterrorism, counternarcotic, fraud, money laundering and human trafficking.

Cyber Security

FOR COMPANIES AND GOVERNMENT

A complete cyber-defense suite comprised of Cyber Security Training, technology and services to ensure the safety of critical assets and operations, and to ensure the personal security of citizenry

Software development

FOR COMPANIES AND GOVERNMENT

Custom & Enterprise Software Solutions for Complex Web Applications. Turn your ideas into powerful applications that drive your business forward.

Travel Security

FOR COMPANIES AND GOVERNMENT

Organise, manage and monitor your travelling staff 24/7, wherever they are, send and receive personalised alerts, offer logistical support and assistance when needed

Technical Support

FOR COMPANIES AND GOVERNMENT

The best technology available on the market, together with the highest quality of technical support

INVESTIGATION SUITE

INVESTIGATION SUITE

negg® Group owns several solutions that allow the silent installation of the agents, suitable for the most common operating systems on both desktop and mobile devices

NES

negg® EXPLOITATION SYSTEM

A dedicated platform used to create rapid settings required to perform a remote injection. The platform is designed to be always up-to-date and make it possible to use the new exploits for different technologies

VB-ISS COMMAND & CONTROL TECHNOLOGY

Permits the real-time interaction with the target through a graphic interface (GUI) designed to be user friendly and intuitive

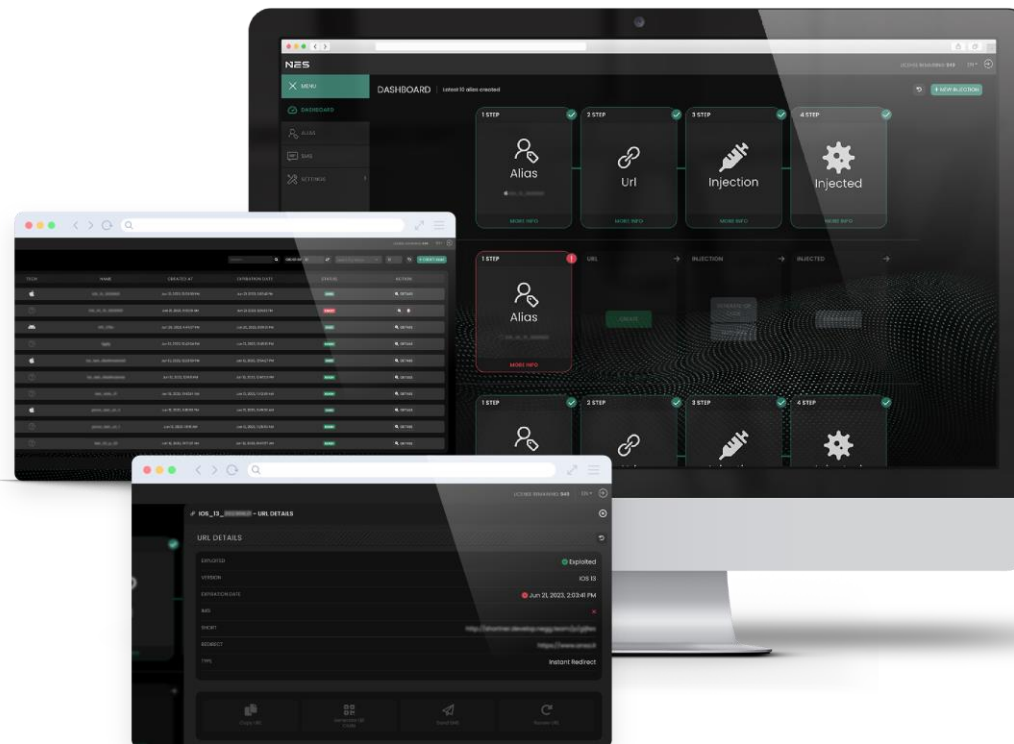

POLA

PATTERN OF LIFE ANALYSIS

A system designed to receive data traffic. It can be directly installed in the network or in a virtualized server that receives and manipulates the data traffic to serve the exploit.

NES

negg® EXPLOITATION SYSTEM

A platform dedicated to creating rapid settings required to perform a remote injection. Once set up, this technology allows the user to configure, generate, inject and activate all new agents. Including LBS (Link Based Solution) through the NES, the investigator can use the "injection links" to attempt injecting the target. R&D constant effort allow to implement capabilities on most recent versions of OS.

VB-ISS COMMAND & CONTROL TECHNOLOGY

This platform permits a real-time interaction with the target through a graphic user interface (GUI) to monitor and control the target device. Investigation commands are performed to control the agent and browse, manage and analyze the data collected.

POLA

PATTERN OF LIFE ANALYSIS

A "man in the middle" system designed to receive data traffic. It can be directly installed in the network or in a virtualized server that receives and manipulates the data traffic to serve the exploit.

INVESTIGATION FLOW

INVESTIGATION WORKFLOW

NES

Platform (integrated with exploits) to create the agent and link to exploit the target (Injection)

Agent:

the negg virus; once installed on the device, it allows to command and control it

URL:

link to the web page used to infect the device. This page is created via NES and exploits a web vulnerability

Injection:

agent installation through QR code, SMS/WA link to be sent to the target

Target profiling required to start the investigation

POLA

Optionally integrated with NES, is a tool that manipulates data traffic

Injection:

agent installation by bypassing the HTTPS protocol through the support of Telco/IMSI Catcher/Wi-fi

No target profiling needed

VB-ISS

Tool used to control the agent that permits investigation; it controls and commands the device and data collection
