AGLC CRM - Complete Knowledge Transfer Document

Project: AGLC CRM (منصة إدارة العملاء - الأحمري وقشلان)

Date: March 9, 2026

Purpose: This document contains all context, specifications, decisions, and architecture needed to continue development in a new Manus task.

TABLE OF CONTENTS

1. Project Overview
2. Technology Stack
3. Project Structure
4. Database Schema (Current)
5. Existing Features (Implemented)
6. Pending/Incomplete Features
7. VPS Deployment Information
8. Design System & Branding
9. User Decisions Log
10. SPECIFICATION: Billing & Timesheet System
11. SPECIFICATION: Fee Proposal Generation System
12. SPECIFICATION: Prospective Client Module
13. SPECIFICATION: AI-Assisted Legal Briefing Module
14. SPECIFICATION: Bespoke Proposal & Print/Scan Handling
15. Implementation Roadmap
16. Key Files Reference
17. Fee Proposal Templates (Analyzed)

---

1. PROJECT OVERVIEW

AGLC CRM is a legal practice management system for Al-Ahmari & Gashlan Law Firm (الأحمري وقشلان للمحاماة والاستشارات القانونية). The system manages clients, service requests,

meetings, contracts, reviews, proposals, documents, and legal tools. It supports Arabic and English (bilingual), with RTL layout support.

Live URL: https://crm.aglc.sa

Firm Website: https://aglc.sa

GitHub: https://github.com/AGLCDEV/aglc-dev.git

---

2. TECHNOLOGY STACK

Layer	Technology
Frontend	React 19 + TypeScript + Tailwind CSS 4 + shadcn/ui
Backend	Express 4 + tRPC 11 + Node.js
Database	PostgreSQL (Drizzle ORM)
Auth	Office 365 SSO (Microsoft Graph API) + Manual username/password (bcrypt)
AI/LLM	Built-in Manus LLM (gemini-2.5-flash) via `invokeLLM()`
Storage	S3 (AWS SDK) via `storagePut()` / `storageGet()`
Routing	wouter (client-side)
State	tRPC + React Query (no Redux/Zustand)
i18n	Custom context-based (LanguageContext with ar.ts/en.ts)
Theme	Custom ThemeContext (light/dark)
Fonts	IBM Plex Sans Arabic, Noto Sans Arabic, Inter
Testing	Vitest (180 test files)
Process Manager	PM2 (on VPS)
Build	Vite + esbuild

---

3. PROJECT STRUCTURE

4. DATABASE SCHEMA (CURRENT)

Existing Tables (27 total)

Table	Purpose
users	User accounts (OAuth + manual login, roles: admin/lawyer/employee/user)
clients	Client records (name, ID, phone, email, address)

requests	Service requests (case, company, trademark, consultation, procedure)
meetings	Scheduled meetings (teams, in_office, calendly, phone)
notifications	System notifications
attachments	File attachments for any entity
activityLogs	Audit trail for all actions
documentTemplates	Document template definitions
generatedDocuments	Documents generated from templates
invitations	User invitations (legacy)
contracts	Contract management
reviews	Legal reviews
proposals	Fee proposals (current basic implementation)
proposalItems	Line items for proposals
taskAssignments	Assign users to tasks
clientAccessTokens	Client portal access tokens
ssoSettings	Office 365 SSO configuration
userPermissions	Granular module permissions per user
smtpSettings	Email/SMTP configuration
saudiLaws	Saudi legal library - laws
lawArticles	Saudi legal library - articles
judicialPrecedents	Saudi legal library - precedents
aiConversations	AI assistant conversation history
aiMessages	AI assistant messages
businessCards	Scanned business cards with OCR
contactCategories	Categories for business card contacts
taskUpdates	Task update notes and amendments

Existing Enums (30 total)

Enum	Values
roleEnum	admin, lawyer, employee, user
serviceTypeEnum	case, company, trademark, consultation, procedure
requestStatusEnum	new, in_progress, pending_docs, completed, cancelled
meetingTypeEnum	teams, in_office, calendly, phone
meetingStatusEnum	scheduled, completed, cancelled, rescheduled
proposalStatusEnum	draft, sent, viewed, negotiating, accepted, rejected, expired
proposalLanguageEnum	ar, en
contractStatusEnum	draft, pending_review, pending_signature, active, expired, terminated, renewed
reviewStatusEnum	pending, in_progress, needs_revision, completed, cancelled
approvalStatusEnum	not_required, pending, approved, rejected
taskTypeEnum	request, contract, review, proposal, meeting
taskRoleEnum	lead, member, reviewer, observer
...	(and 18 more - see schema.ts for full list)

---

5. EXISTING FEATURES (IMPLEMENTED)

Core CRM

- Dashboard with statistics (clients, requests, active, completed)
- Client management (CRUD, detail view, search)
- Service requests (5 types: case, company, trademark, consultation, procedure)

- Grouped requests view (by client)
- Meetings management (Teams, in-office, Calendly, phone)
- Calendar view
- Notifications system
- Activity log (audit trail)
- File attachments (S3 storage)
- Excel import/export
- Financial reports

Document Management

- Document templates (15 categories)
- Document generation from templates
- Contract management (7 statuses, lifecycle tracking)
- Legal reviews (5 types, priority levels)
- Proposals (basic implementation - to be replaced by new system)

User Management & Auth

- Office 365 SSO (Microsoft Graph API)
- Manual username/password login (bcrypt)
- Role-based access (admin, lawyer, employee, user)
- Granular module permissions (14 modules with checkboxes)
- Admin can add users from Office 365 tenant list
- Admin can create manual users

Legal Tools

- Saudi Legal Library (laws, articles, precedents - partially seeded)
- AI Legal Assistant (LLM-powered chat with legal context)
- Translation Tool (Arabic/English with legal terminology)
- Business Card Scanner (OCR via LLM vision, follow-up via WhatsApp/email)

Task Management

- My Tasks view

- Task assignments (lead, member, reviewer, observer)
- Task updates and amendments (notes, status changes, priority)

Client Portal

- Separate portal login (token-based)
- Portal dashboard, requests, contracts, proposals, reviews, documents, attachments, meetings

i18n

- Full Arabic and English translations
- RTL layout support
- Language switcher component

---

6. PENDING/INCOMPLETE FEATURES

These items from todo.md are NOT yet implemented:

- [ ] SSO error diagnosis on crm.aglc.sa (Phase 7)
- [ ] Optimize board member images (Phase 15)
- [ ] Rename "Structure" page to "About Us" (Phase 15)
- [ ] Fix AI Legal Assistant on VPS (Phase 16)
- [ ] Fix Translation Tool on VPS (Phase 16)
- [ ] Seed legal library with real Saudi laws (Phase 16)
- [ ] Deploy manual user creation to VPS (Phase 17)
- [ ] **IMPLEMENT: Billing & Fee Proposal System** (awaiting command)

---

7. VPS DEPLOYMENT INFORMATION

Item	Value
Hostname	51.83.159.123
Domain	crm.aglc.sa
SSH User	root

SSH Password	One@pps!@#456
App Path	/home/AGLC_CRM/aglc-dev
Branch	main
Port	3000
Process Manager	PM2 (process name: aglc-crm)
DB Host	localhost:5432
DB Name	aglc_crm
DB User	aglc_user
DB Password	aglc_password
GitHub Token (VPS)	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

Deployment Commands

Bash

```bash
ssh root@51.83.159.123
cd /home/AGLC_CRM/aglc-dev
git pull origin main
pnpm install
DATABASE_URL='postgresql://aglc_user:aglc_password@localhost:5432/aglc_crm' pnpm
DATABASE_URL='postgresql://aglc_user:aglc_password@localhost:5432/aglc_crm' pnpm
pm2 restart aglc-crm
pm2 logs aglc-crm --lines 20 --nostream
```

Active Users (as of Feb 27, 2026)

ID	Name	Email	Role
1	Mohamed Gashlan	mohamedagashlan@gmail.com	Admin
240001	Ahmed Fouad	am.fouad152@gmail.com	User
690001	Moe Gash	gashlan201@gmail.com	User

690002	IT Services	IT@aglc.sa	Admin
690007	Mohamed Gashlan	mag@aglc.sa	Admin

---

8. DESIGN SYSTEM & BRANDING

Color Palette (OKLCH format in index.css)

```CSS
--color-gold: oklch(0.72 0.12 75);        /* Gold accent */
--color-gold-light: oklch(0.85 0.08 75);  /* Light gold */
--color-navy: oklch(0.28 0.05 250);       /* Navy primary */
--color-navy-light: oklch(0.35 0.05 250); /* Light navy */
--background: oklch(0.98 0.002 250);      /* Light background */
--foreground: oklch(0.18 0.02 250);       /* Dark text */
--primary: oklch(0.28 0.05 250);          /* Navy primary */
```

Typography

- Arabic: IBM Plex Sans Arabic (headings), Noto Sans Arabic (body)
- English: Inter, Segoe UI
- Font variable: `--font-sans: 'IBM Plex Sans Arabic', 'Noto Sans Arabic', sans-serif`

Design Philosophy

- Swiss International Style with Arabic contemporary touches
- Corporate refined aesthetic
- Navy blue (#1B3A5C equivalent) for trust and professionalism
- Gold (#C9A96E equivalent) for important elements
- Light gray backgrounds for spaces
- Fixed sidebar navigation + main content area with organized cards

---

9. USER DECISIONS LOG

All decisions confirmed by the client (Mohamed Gashlan) during this task:

Billing System Decisions

1. **File Number Format:** Auto-sequential starting with "AG" (e.g., AG-001, AG-002)
2. **Subfolder Hierarchy:** Only two levels (AG-001 main, AG-001-01 subfolder)
3. **Billing Types:** Fixed, Hourly, Other - selected at client creation
4. **User Tiers:** Partner, Senior Legal Consultant, Legal Consultant/Attorney, Trainee, Paralegal - flexible (admin can add more)
5. **Tier Assignment:** Admin assigns and can change user tier at any time from dashboard
6. **Invoice Numbering:** AG-[clientNumber]-[serial] (e.g., AG-331-01 for first invoice)
7. **Invoice Content:** References fee proposal date, says "per the attached breakdown"
8. **Breakdown Period:** Custom date range, default shows current month (1st to creation date)
9. **Draft Entries:** User can edit and add/amend draft entries
10. **Multiple Rates:** Single rate per tier per client (from retainer agreement)
11. **Retainer Tracking:** Track for reference mainly
12. **Allotted Hours:** Retainers have allotted hours at flat discounted rate + additional hours at tier-based schedule
13. **Threshold Notifications:** At 50%, 75%, 100% - notify admin AND assigned lawyer
14. **Tier Changes:** Past entries keep original tier, admin prompted if they want to change
15. **Period Renewal:** Notify admin, ready for one-command creation with option to change terms

Fee Proposal Decisions

1. **Fee Proposal Types:** All 6 categories APPROVED (Legal Services, Litigation, ADR, Corporate, Other Procedures, Specialized + "Other" under Specialized)
2. **Amendment Tracking:** Admin approval REQUIRED for all amendments
3. **Payment Terms:** All variations confirmed + custom manual entry option
4. **DocuSign:** Single account, 2 authorized signatories (each can sign individually)
5. **Proposal Expiry:** Auto-expire with reminders (3 days, 1 day before) - admin can override if client signs after expiry
6. **Proposal Versioning:** Support multiple versions
7. **Existing Clients:** Can create proposals for existing clients
8. **Language:** Arabic AND English templates

9. **Existing Client Integration:** Auto-assign AG numbers, admin notified to review and approve

Prospective Client & AI Briefing Decisions

1. **Prospective Client Module:** PC-XX numbering, pre-proposal file management
2. **Non-Digital Clients:** Print PDF option, upload scanned signed version (by admin)
3. **Signed Proposal:** Always required, admin can override as exception
4. **Bespoke Proposals:** Admin can manually upload unique/complex proposals, system integrates same way
5. **AI Briefing:** Wizard-type questionnaire, user must tick "reviewed and cross-checked" box, admin notified for review

---

10. SPECIFICATION: Billing & Timesheet System

New Database Tables Required

`client_folders` table

Plain Text

```
id (PK)
fileNumber (UNIQUE, e.g., "AG-001", "AG-001-01")
parentFileNumber (nullable, FK for subfolders)
clientId (FK to clients)
clientName (denormalized)
billingType (ENUM: 'fixed', 'hourly', 'other')
status (ENUM: 'active', 'inactive', 'archived')
createdBy (FK to users)
createdAt (bigint, UTC ms)
updatedAt (bigint, UTC ms)
```

`retainer_agreements` table

Plain Text

```
id (PK)
clientFolderId (FK)
fileNumber (denormalized)
proposalDocumentUrl (S3 URL - REQUIRED, admin can override)
proposalDate (bigint, UTC ms)
```

```
agreementType (ENUM: 'hourly_retainer', 'fixed_fee', 'hybrid')
allottedHours (integer, nullable)
allottedPeriodMonths (integer, e.g., 3)
allottedRate (integer, SAR - flat rate for allotted hours)
additionalHourRates (JSONB: {"partner": 2000, "seniorLegalConsultant": 1800, ..
renewalAutomatic (boolean, default true)
renewalNoticeDays (integer, e.g., 15)
thresholdNotifications (JSONB array: [50, 75, 100])
periodStartDate (bigint, UTC ms)
periodEndDate (bigint, UTC ms)
status (ENUM: 'active', 'expired', 'terminated', 'pending_renewal')
createdBy (FK to users)
createdAt (bigint, UTC ms)
updatedAt (bigint, UTC ms)
```

`retainer_periods` table

Plain Text

```
id (PK)
retainerAgreementId (FK)
periodNumber (integer, sequential)
startDate (bigint, UTC ms)
endDate (bigint, UTC ms)
allottedHours (integer, carried from agreement)
usedHours (decimal, calculated)
additionalHours (decimal, calculated)
allottedCost (integer, SAR)
additionalCost (integer, SAR, calculated)
status (ENUM: 'active', 'completed', 'invoiced')
createdAt (bigint, UTC ms)
```

`timesheet_entries` table

Plain Text

```
id (PK)
userId (FK to users - who logged)
userTier (ENUM: 'partner', 'senior_legal_consultant', 'legal_consultant', 'trai
clientFolderId (FK)
fileNumber (denormalized)
retainerAgreementId (FK)
retainerPeriodId (FK)
date (bigint, UTC ms)
matterName (varchar, e.g., "Franchise Agreement Review")
workType (ENUM: 'conference_call', 'review', 'research', 'drafting', 'negotiati
```

```
hoursSpent (decimal, e.g., 1.5)
rate (integer, SAR - auto-filled from agreement based on user tier)
amount (integer, SAR - calculated: hours * rate)
notes (text, optional - ONLY optional field)
status (ENUM: 'draft', 'submitted', 'returned', 'approved')
adminComment (text, nullable)
submittedAt (bigint, nullable)
approvedAt (bigint, nullable)
approvedBy (FK to users, nullable)
createdAt (bigint, UTC ms)
updatedAt (bigint, UTC ms)
```

`timesheet_breakdowns` table

Plain Text

```
id (PK)
retainerAgreementId (FK)
retainerPeriodId (FK)
fileNumber (denormalized)
periodStart (bigint, UTC ms)
periodEnd (bigint, UTC ms)
totalAllottedHours (decimal)
totalUsedHours (decimal)
totalAdditionalHours (decimal)
allottedCost (integer, SAR)
additionalCost (integer, SAR)
totalCost (integer, SAR)
generatedBy (FK to users)
generatedAt (bigint, UTC ms)
pdfUrl (S3 URL, nullable)
status (ENUM: 'draft', 'finalized')
```

`invoices` table

Plain Text

```
id (PK)
invoiceNumber (UNIQUE, e.g., "AG-331-01")
clientFolderId (FK)
fileNumber (denormalized)
retainerAgreementId (FK, nullable)
breakdownId (FK to timesheet_breakdowns, nullable)
invoiceType (ENUM: 'allotted_hours', 'additional_hours', 'renewal', 'fixed_fee'
proposalReference (text, e.g., "Fee Proposal dated 15/01/2026")
periodFrom (bigint, nullable)
```

```
periodTo (bigint, nullable)
subtotal (integer, SAR)
vatRate (decimal, default 15%)
vatAmount (integer, SAR)
total (integer, SAR)
notes (text, nullable)
status (ENUM: 'draft', 'sent', 'paid', 'overdue', 'cancelled')
pdfUrl (S3 URL, nullable)
generatedBy (FK to users)
generatedAt (bigint, UTC ms)
sentAt (bigint, nullable)
paidAt (bigint, nullable)
```

`user_tiers` table (extends users)

Plain Text

```
id (PK)
userId (FK to users)
tier (ENUM: 'partner', 'senior_legal_consultant', 'legal_consultant', 'trainee'
effectiveFrom (bigint, UTC ms)
effectiveTo (bigint, nullable - null means current)
assignedBy (FK to users)
createdAt (bigint, UTC ms)
```

Timesheet Entry Workflow

1. **User opens Timesheet module** → sees "Log New Entry" form
2. **Dropdown: Select File Number** → only shows hourly retainer clients (filtered)
3. **System auto-fills:** Client name, retainer agreement details, user's tier, applicable rate
4. **User fills required fields:**
   - Date (date picker)
   - Matter Name (text input, e.g., "Franchise Agreement Review")
   - Work Type (dropdown: Conference Call, Review, Research, Drafting, Negotiation, etc.)
   - Hours Spent (number input)
   - Notes (text, OPTIONAL - only optional field)
5. **System calculates:** Amount = Hours × Rate (based on user tier from agreement)
6. **User submits** → Entry saved as "Draft", visible to user as read-only with "Draft" badge

7. **Admin reviews** → Can:
   - **Approve** → Entry status = "approved"
   - **Return with comment** → Entry status = "returned", user can edit and resubmit
   - **Amend & Approve** → Admin edits directly and approves in one step
8. **Admin generates breakdown** for selected period:
   - Shows all approved entries with: date, user, tier, matter, work type, hours, rate, amount
   - Separates allotted hours vs. additional hours
   - Calculates totals
9. **Admin generates invoice(s):**
   - Option 1: Breakdown only
   - Option 2: Invoice only
   - Option 3: Both breakdown and invoice
   - Invoice references fee proposal date and says "per the attached breakdown"

Threshold Notification Logic

Plain Text

```
When timesheet entry is approved:
  Calculate total used hours for current period
  For each threshold in agreement.thresholdNotifications:
    If usedHours >= (allottedHours * threshold / 100):
      If not already notified for this threshold:
        Notify admin AND assigned lawyer
        Record notification sent
```

Period Renewal Logic

Plain Text

```
When period end date approaches (renewalNoticeDays before):
  Notify admin: "Retainer period ending for [client] on [date]"
  Show "Renew" button with pre-filled terms from current agreement
  Admin can:
    - One-click renew (same terms, new period dates)
    - Modify terms and renew
    - Let expire (no action)
```

11. SPECIFICATION: Fee Proposal Generation System

Fee Proposal Categories & Types

Category	Types
Legal Services	General Legal Consultation, Retainer Agreement (Hourly), Legal Opinion, Due Diligence, Compliance Advisory, Regulatory Advisory
Litigation	Civil Litigation, Criminal Defense, Commercial Dispute, Labor Dispute, Administrative Appeal, Enforcement Proceedings
Alternative Dispute Resolution	Arbitration (Domestic), Arbitration (International), Mediation, Conciliation, Expert Determination
Corporate Procedures	Company Formation (LLC), Company Formation (JSC), Company Formation (Branch), Articles Amendment, Capital Change, Merger/Acquisition, Liquidation, Board Resolution, Shareholder Agreement
Other Procedures	Trademark Registration, Patent Filing, Criminal Complaint (AG/Police), Notarization, Power of Attorney, Visa/Immigration, Real Estate Registration
Specialized	Franchise Agreement, Employment Law Package, IP Portfolio Management, Data Privacy Compliance, Other

Fee Structures

Structure	Description
Hourly Retainer	Allotted hours at flat rate + additional hours at tier schedule
Fixed Fee	Single fixed amount for defined scope

Contingency	Success-based fee (condition + amount)
Hybrid	Combination (e.g., fixed retainer + contingency bonus)

Payment Term Variations

- Advance (full payment before work)
- Advance & Installments (partial advance + scheduled payments)
- Deferred (payment after completion)
- Contingent Only (payment only on success)
- Mixed (advance + contingent)
- Per Agreement (custom manual entry)

Proposal Template Structure (JSON)

JSON

```
{
  "sections": {
    "header": { "firmLogo": true, "firmName": true, "date": "auto" },
    "clientInfo": { "editable": true, "fields": ["name", "representative", "add
    "introduction": { "standardText": "...", "editable": true },
    "scope": { "editable": true, "freeText": true },
    "feeStructure": { "type": "retainer|fixed|contingency|hybrid", "editable":
    "period": { "editable": true, "fields": ["duration", "startDate", "renewal"
    "paymentTerms": { "dropdown": true, "customEntry": true },
    "generalTerms": { "standardText": "...", "editable": true },
    "signatures": { "firmSignatory": "dropdown (2 signatories)", "clientSignatu
    "appendices": { "optional": true }
  },
  "language": "ar|en|both"
}
```

DocuSign Integration

- Single DocuSign account for the firm
- 2 authorized signatories stored in system (name, title, email)
- Each can sign individually
- Admin selects which signatory signs each proposal

- Webhook for status updates (sent, viewed, signed)
- Fallback: Print PDF → scan signed version → upload

Proposal Lifecycle

```Plain Text
Draft → Under Review → Approved → Sent (DocuSign/Email/Print) →
  → Signed → Client File Created → Billing Integrated
  → Expired (auto, with override option)
  → Rejected
```

Standard Terms & Conditions (from analyzed templates)

The system stores standard terms that appear in all proposals:

- Confidentiality clause
- Conflict of interest
- Governing law (Saudi Arabia)
- Dispute resolution
- Termination provisions
- Force majeure
- Amendment requirements
- Entire agreement clause

These are editable per proposal but default to standard text.

---

12. SPECIFICATION: Prospective Client Module

Purpose

Pre-proposal file management for potential clients who have not yet been formally onboarded.

Numbering

- Format: PC-001, PC-002, PC-003 (auto-sequential)
- Separate sequence from AG-XXX client numbers

Database Table: `prospective_clients`

```
Plain Text

id (PK)
pcNumber (UNIQUE, e.g., "PC-001")
clientName (varchar, editable by admin before proposal issuance)
contactPerson (varchar, nullable)
phone (varchar, nullable)
email (varchar, nullable)
source (varchar, e.g., "referral", "website", "walk-in")
notes (text)
status (ENUM: 'active', 'converted', 'declined', 'inactive')
convertedToFileNumber (varchar, nullable - AG number after conversion)
createdBy (FK to users)
createdAt (bigint, UTC ms)
updatedAt (bigint, UTC ms)
```

Database Table: `prospective_client_files`

```
Plain Text

id (PK)
prospectiveClientId (FK)
fileName (varchar)
fileUrl (S3 URL)
fileType (varchar, e.g., "contract", "correspondence", "id_document")
uploadedBy (FK to users)
uploadedAt (bigint, UTC ms)
```

Workflow

1. User/Admin creates prospective client record (PC-XXX)
2. Upload received files (documents, correspondence, etc.)
3. Optionally generate AI-assisted briefing (see Section 13)
4. Admin reviews and decides:
   - Generate fee proposal from prospective client data
   - Request more information from user
   - Decline/archive
5. When fee proposal is signed:
   - Convert PC-XXX to AG-XXX (new client file)

- All files transfer to new client folder
- Admin can change client name before conversion

---

13. SPECIFICATION: AI-Assisted Legal Briefing Module

Purpose

Generate professional legal briefing documents from prospective client information using AI, with structured wizard input.

Wizard Flow (6 Steps)

Step 1: Client Context

- Client name (auto-filled from PC record)
- Contact person
- Industry/sector (dropdown)
- Client type (individual/company/government)

Step 2: Matter Details

- Matter type (dropdown: matches fee proposal categories)
- Matter subtype (dropdown: matches fee proposal types)
- Jurisdiction (dropdown: Saudi regions + international)
- Urgency level (dropdown: routine, urgent, critical)

Step 3: Facts & Background

- Text box: "Describe the client's situation" (with example prompt)
- Text box: "What documents did the client provide?" (with examples)
- File upload: attach relevant documents from PC files

Step 4: Client's Request

- Text box: "What is the client asking for?" (with examples)
- Checkboxes: Legal opinion needed, Representation needed, Document drafting needed, Advisory needed, Other

Step 5: AI Generation Options

- Briefing type (dropdown): Initial Assessment, Detailed Analysis, Recommendations Report, Risk Assessment

- Include sections (checkboxes): Facts Summary, Legal Analysis, Applicable Laws, Risks, Recommendations, Estimated Timeline, Estimated Costs
- Language: Arabic / English / Both
- Tone: Formal / Concise / Detailed

Step 6: Review & Confirm

- Preview of all inputs
- **MANDATORY checkbox: "I have reviewed and cross-checked the AI-generated content"**
- Generate button

AI Briefing Document Structure (10 Sections)

1. Executive Summary
2. Client Information
3. Facts & Background
4. Client's Request
5. Legal Analysis
6. Applicable Saudi Laws & Regulations
7. Risk Assessment
8. Recommendations
9. Estimated Timeline
10. Next Steps

Post-Generation Workflow

1. AI generates briefing document (Word/PDF)
2. User reviews and ticks mandatory confirmation checkbox
3. Brief saved with "pending_review" status
4. Admin notified for review
5. Admin can:
    - Approve → brief finalized
    - Return with comments → user revises
    - Generate fee proposal from brief data
    - Request more information/analysis

14. SPECIFICATION: Bespoke Proposal & Print/Scan Handling

Non-Digital (Print/Scan) Flow

1. Admin generates fee proposal in system
2. Admin clicks "Print PDF" to download
3. Physical copy sent to client for signature
4. When signed copy returns:
    - Admin uploads scanned signed PDF
    - System marks proposal as "signed"
    - Normal integration flow continues (client file creation, billing setup)

Bespoke Proposal Flow

For unique/complex scopes where proposal is created manually outside the system:

1. Admin clicks "Upload Bespoke Proposal"
2. Uploads the manually created and signed proposal document
3. System creates a proposal record with:
    - Type: "bespoke"
    - Status: "signed" (already signed)
    - All standard fields filled manually by admin
4. Admin fills in:
    - Client information
    - Billing type and rates
    - Period and terms
5. System performs same integration:
    - Creates client file (AG-XXX)
    - Sets up retainer agreement
    - Enables timesheet and billing

Signed Proposal Requirement

- **Always required** for client file creation

- Admin can override as exception (with reason logged)
- Override creates an audit trail entry

---

15. IMPLEMENTATION ROADMAP

Phase 1: Database Foundation (Week 1)

- Add new enums to schema.ts
- Create all new tables (client_folders, retainer_agreements, retainer_periods, timesheet_entries, timesheet_breakdowns, invoices, user_tiers, prospective_clients, prospective_client_files, ai_briefings, fee_proposal_types, fee_proposal_templates, docusign_signatories)
- Run migrations (`pnpm db:push`)

Phase 2: Client File System (Week 1-2)

- File number generation (AG-XXX auto-sequential)
- Client folder CRUD with billing type selection
- Subfolder creation (AG-XXX-01)
- Existing client migration (auto-assign AG numbers, admin notification)

Phase 3: User Tier Management (Week 2)

- User tier assignment UI in admin dashboard
- Tier history tracking
- Tier change prompt logic

Phase 4: Retainer Agreement Management (Week 2-3)

- Agreement creation with all fields
- Rate structure configuration (per tier)
- Period management
- Threshold configuration

Phase 5: Timesheet Module (Week 3)

- Entry form with auto-populate
- Draft/submit/review workflow

- Admin review queue with amend & approve
- Entry history and filtering

Phase 6: Breakdown & Invoice Generation (Week 3-4)

- Breakdown generation (allotted vs. additional hours)
- Invoice generation with AG-XXX-NN numbering
- PDF generation for both
- Invoice references fee proposal

Phase 7: Fee Proposal Generation (Week 4-5)

- Template management (Arabic + English)
- Proposal creation wizard
- Standard terms management
- Amendment tracking with admin approval
- Versioning support
- Print/scan and bespoke upload flows

Phase 8: Prospective Client Module (Week 5)

- PC-XXX numbering and CRUD
- File upload and management
- Conversion to client file

Phase 9: AI-Assisted Briefing (Week 5)

- 6-step wizard UI
- LLM integration for document generation
- Mandatory review checkbox
- Admin notification and review

Phase 10: DocuSign Integration (Week 5-6)

- API setup with 2 signatories
- Send for signature
- Webhook for status updates

- Fallback to manual upload

Phase 11: Notifications & Renewals (Week 6)

- Threshold notifications (50%, 75%, 100%)
- Period renewal notifications
- One-command renewal with term modification
- Auto-expiry for proposals with override

Phase 12: Testing & Deployment (Week 6)

- Vitest tests for all new routers
- Integration testing
- VPS deployment
- Existing client migration execution

---

16. KEY FILES REFERENCE

Specification Documents (in /home/ubuntu/aglc-crm/)

File	Size	Content
BILLING_SYSTEM_SPEC.md	42 KB	Complete billing and timesheet specification
FEE_PROPOSAL_SYSTEM_SPEC.md	46 KB	Complete fee proposal generation specification

17. FEE PROPOSAL TEMPLATES (ANALYZED)

English Template Structure (from Innovative Concept Company retainer)

1. **Header:** AGLC letterhead with logo
2. **Date and Reference**
3. **Client Information:** Company name, CR number, representative
4. **Introduction:** Brief about AGLC and engagement purpose
5. **Scope of Services:** Detailed description of legal services
6. **Fee Structure:**
   - Allotted hours per period (e.g., 60 hours over 3 months)
   - Flat rate for allotted hours (e.g., 96,000 SAR)
   - Additional hours billed at schedule:
     - Partner: 2,000 SAR/hr
     - Senior Legal Consultant: 1,800 SAR/hr
     - Legal Consultant/Attorney: 1,500 SAR/hr
     - Trainee: 800 SAR/hr
     - Paralegal: 500 SAR/hr
7. **Period:** Duration with automatic renewal unless notice given
8. **Payment Terms:** Advance payment for allotted hours per period
9. **General Terms & Conditions:** Standard clauses
10. **Signatures:** Two signature blocks (firm + client)

Arabic Template Structure (from نموذج عرض الأتعاب بالساعة)

Same structure as English but in Arabic, with:

- Right-to-left layout
- Arabic legal terminology
- Saudi Riyal (ريال سعودي) currency

- Hijri date option alongside Gregorian

Key Retainer Terms (from analyzed templates)

- Allotted hours are paid in advance for the period
- Additional hours billed monthly in arrears
- Client notified at 50% and 75% of allotted hours usage
- Automatic renewal unless 15-day written notice before period end
- 15% VAT applied to all invoices
- Payment due within 15 days of invoice date

IMPORTANT NOTES FOR IMPLEMENTATION

1. **Do NOT modify files under** `server/_core/` - these are framework files
2. **Split routers** when they exceed ~150 lines - create files under `server/routers/`
3. **Use** `pnpm db:push` after schema changes (runs `drizzle-kit generate && drizzle-kit migrate`)
4. **All timestamps** stored as UTC milliseconds (bigint)
5. **All money amounts** stored as integers (SAR, no decimals)
6. **Use** `storagePut()` for file uploads to S3 - never store files in database
7. **Use** `invokeLLM()` for AI features - credentials are pre-configured
8. **Write Vitest tests** for all new routers before delivery
9. **Update i18n files** (ar.ts and en.ts) for all new UI text
10. **Update Sidebar.tsx** for new navigation items
11. **Update App.tsx** for new routes
12. **Update todo.md** for all new features
13. **The existing** `proposals` **table** will need to be migrated/extended for the new fee proposal system
14. **The existing** `clients` **table** needs `fileNumber` and `billingType` columns added
15. **Office 365 SSO** is the primary auth method - manual login is secondary
16. **All admin actions** should create activity log entries
17. **The client portal** may need updates to show invoice/billing information
