AGLC Law Firm CRM: Master Documentation Index

Project: AGLC Law Firm CRM (PPP Platform)
Version: 1.0
Date: March 12, 2026
Purpose: Complete navigation guide to all project documentation

---

Quick Navigation

For Different Audiences

👔 Executive Leadership

- Start with: Executive Summary
- Then read: Strategic Overview
- Reference: Budget & Timeline

👨‍💼 Project Managers

- Start with: Project Status
- Then read: Implementation Checklist
- Reference: Team Directory

👨‍💻 Development Team

- Start with: Architecture Overview
- Then read: Code Examples
- Reference: Configuration Guide

🔧 DevOps & Infrastructure

- Start with: Infrastructure Architecture

- Then read: Configuration Guide
- Reference: Deployment Procedures

🧪 **QA & Testing**

- Start with: Testing Strategy
- Then read: Implementation Checklist
- Reference: Code Examples

Documentation Map

Core Documentation

Document	Purpose	Audience	Location
Master Index	Navigation guide	All	This document
Project Status	Current project state	Leadership, PM	`/aglc-crm/STATUS.md`
TODO List	Feature tracking	Dev team, PM	`/aglc-crm/todo.md`
Implementation Checklist	Task breakdown	Dev team, PM	`/aglc-crm/CHECKLIST.md`
Code Examples	Implementation patterns	Dev team	`/aglc-crm/CODE_EXAMPLES.md`
Configuration Guide	System setup	DevOps, Dev team	`/aglc-crm/CONFIGURATION.md`
Team Directory	Contact information	All	`/aglc-crm/TEAM.md`

Strategic Documentation

Document	Purpose	Audience	Location
Implementation Guide	Detailed roadmap	Leadership, PM	`/AGLC_CRM_Implementation_Guide.pdf`
Recommendations	Strategic guidance	Leadership	`/AGLC_CRM_Recommendations_Summary.pdf`
Knowledge Transfer	System knowledge	All	`/AGLC_CRM_Knowledge_Transfer_Guide.pdf`
Quick Reference	Quick lookup	All	`/AGLC_CRM_Quick_Reference.pdf`

Visual Documentation

Document	Purpose	Audience	Location
System Architecture	Component diagram	Tech lead, Dev team	`/crm_system_architecture.png`
Phased Roadmap	Timeline visualization	Leadership, PM	`/crm_phased_roadmap.png`
AI Agents Framework	Agent architecture	Tech lead, Dev team	`/crm_ai_agents_framework.png`
Case Workflow	Process flow	All	`/crm_case_workflow.png`

Executive Summary

Project Overview

The AGLC Law Firm CRM is a comprehensive case and task management platform designed specifically for law firms. The system integrates AI-powered agents, gamification, wellness features, and executive controls to optimize case management, team productivity, and client satisfaction.

Key Features

Phase 1 MVP (8 weeks, $120K):

- Case management with templates
- Task tracking and Kanban board
- VIP client portal
- Gamification system (Spin the Wheel)
- Wellness reminders and mood tracking
- Executive dashboard
- AI Planner and Tracker agents
- Authentication and authorization

Phase 2-4 (Advanced Features):

- Crisis Manager and Resource agents
- WhatsApp integration
- Smart task assignment
- Advanced analytics and reporting
- Mobile app
- Multi-office support

Success Metrics

- System adoption: 90%+
- Task completion on time: 95%+
- User satisfaction: $^4/_5$ average
- Case cycle time reduction: 20%
- System uptime: 99.9%+

Budget & Timeline

- **Phase 1:** $120,500 (8 weeks)
- **Phase 2:** $105,000 (8 weeks)

- **Phase 3:** $120,000 (8 weeks)
- **Phase 4:** $150,000+ (ongoing)
- **Total Year 1:** ~$570,000

Strategic Overview

Vision & Goals

Vision: Empower law firms with intelligent case management that combines human expertise with AI-driven insights.

Goals:

1. Reduce case cycle time by 20%
2. Improve team productivity by 30%
3. Increase client satisfaction to 4.5/5
4. Achieve 90%+ system adoption
5. Maintain 99.9%+ uptime

Market Opportunity

- **Target Market:** Mid-size law firms (50-500 employees)
- **Market Size:** $2B+ CRM market
- **Competitive Advantage:** AI agents + gamification + wellness
- **Pricing Model:** SaaS subscription ($5-20K/month)

Technology Stack

Frontend: React 19, TypeScript, Tailwind CSS, shadcn/ui
Backend: Node.js 22, Express 4, tRPC 11
Database: PostgreSQL 14+
AI: OpenAI GPT-4
Integrations: Twilio (WhatsApp), SendGrid (Email), AWS S3
Deployment: Manus Platform

Architecture Overview

System Architecture (5 Layers)

Layer 1: Executive Control

- Leadership dashboards
- SWOT analysis tools
- Performance analytics
- Sandbox prep area

Layer 2: AI Orchestration

- Multi-agent system (7 agents)
- Agent coordination engine
- Fallback rules and templates
- Learning and optimization

Layer 3: Business Logic

- Case management
- Task management
- Team assignment
- Client communication

Layer 4: Data & Integration

- PostgreSQL database
- Redis caching
- S3 file storage
- API integrations

Layer 5: External Services

- OpenAI LLM
- Twilio WhatsApp
- SendGrid Email

- Google Maps
- Calendar services

Database Schema

Core Tables:

- `users` - Team members and admins
- `clients` - Client information
- `cases` - Case records
- `phases` - Case phases
- `tasks` - Tasks and subtasks
- `communications` - Messages and calls
- `performance` - Performance metrics
- `auditLogs` - System audit trail

API Architecture

tRPC Procedures:

- `auth.*` - Authentication and authorization
- `cases.*` - Case management
- `tasks.*` - Task management
- `clients.*` - Client management
- `dashboard.*` - Dashboard data
- `ai.*` - AI agent operations
- `system.*` - System operations

Project Status

Current Phase: Planning & Initialization (COMPLETED)

Status: ✅ Ready for Phase 1
Completion: 100%
Timeline: March 11-12, 2026

Deliverables Completed:

- Project initialization
- Technology stack selection
- System architecture design
- Database schema design
- Feature prioritization
- Comprehensive documentation
- Visual diagrams
- Risk assessment

Phase 1: MVP Development (PENDING)

Status: ⏳ Ready to start
Estimated Timeline: 8 weeks (March 19 - May 14, 2026)
Team Size: 3-4 developers, 1 DevOps, 1 QA
Budget: $120,500

Phase 1 Features:

1. Case Management (120 hours)
2. Task Management (100 hours)
3. VIP Client Portal (100 hours)
4. Gamification System (60 hours)
5. Wellness Features (40 hours)
6. Executive Dashboard (80 hours)
7. AI Planner Agent (80 hours)

8. AI Tracker Agent (60 hours)
9. Authentication & Authorization (40 hours)
10. Infrastructure & Deployment (80 hours)

Total Effort: 600 hours

Upcoming Phases

Phase 2 (Weeks 9-16): AI & Integration
Phase 3 (Weeks 17-24): Advanced Analytics
Phase 4 (Weeks 25+): Enterprise Features

Budget & Timeline

Phase 1 Budget Breakdown

Category	Amount	Notes
Development	$90,000	3-4 developers × 8 weeks
Infrastructure	$10,000	Database, hosting, monitoring
Testing	$5,000	QA engineer, testing tools
Documentation	$2,000	Technical writing
Contingency (15%)	$13,500	Risk buffer
Total	**$120,500**	

Full Year Budget

Phase	Duration	Cost	Cumulative
Phase 1 (MVP)	8 weeks	$120,500	$120,500
Phase 2 (AI & Integration)	8 weeks	$105,000	$225,500
Phase 3 (Advanced Analytics)	8 weeks	$120,000	$345,500
Phase 4 (Enterprise)	8+ weeks	$150,000+	$495,500+
Year 1 Total	**24+ weeks**	**$570,000**	

Timeline Visualization

```
Phase 0: Planning & Initialization
├─ Week 1-2: Complete ✅
└─ Status: COMPLETED

Phase 1: MVP Development
├─ Week 1-8: Pending ⏳
├─ Start: March 19, 2026
├─ End: May 14, 2026
└─ Status: READY TO START

Phase 2: AI & Integration
├─ Week 9-16: Planned 🔵
└─ Timeline: May 15 - July 9, 2026

Phase 3: Advanced Analytics
├─ Week 17-24: Planned 🔵
└─ Timeline: July 10 - September 4, 2026

Phase 4: Enterprise Features
├─ Week 25+: Planned 🔵
└─ Timeline: September 5, 2026 onwards
```

Implementation Checklist

Pre-Implementation (Week 1)

- [ ] Stakeholder approval obtained
- [ ] Budget confirmed
- [ ] Team members assigned
- [ ] Development environment set up
- [ ] Repository configured
- [ ] Communication channels created
- [ ] Project management tools configured
- [ ] Team onboarding completed

Week 1-2: Foundation & Database

- [ ] Database created and configured
- [ ] Schema migrations applied
- [ ] Test data seeded
- [ ] tRPC routers structured
- [ ] Database helpers implemented
- [ ] Authentication integrated
- [ ] Frontend project structure created
- [ ] Design system configured

Week 3-4: Case Management

- [ ] Case database and API implemented
- [ ] Case templates created
- [ ] Case UI components built
- [ ] Case list and detail pages completed
- [ ] Case testing completed
- [ ] Case documentation written

Week 5-6: Task Management

- [ ] Task database and API implemented
- [ ] Task Kanban board created
- [ ] Task list view implemented
- [ ] Task assignment logic built
- [ ] Task testing completed
- [ ] Task documentation written

Week 7-8: Features & Deployment

- [ ] VIP Client Portal completed
- [ ] Gamification system implemented
- [ ] Wellness features added
- [ ] Executive Dashboard built
- [ ] AI Agents integrated
- [ ] Production deployment completed
- [ ] Team training conducted
- [ ] Soft launch executed

Post-Launch (Week 9)

- [ ] System monitoring active
- [ ] Issue resolution process active
- [ ] Feedback collection ongoing
- [ ] Success metrics tracked
- [ ] Documentation updated
- [ ] Phase 2 planning initiated

Code Examples

Adding a New Feature

Step-by-step guide for implementing a new feature from database to UI:

1. **Define Database Schema** (`drizzle/schema.ts`)
2. **Create Database Migration** (`pnpm db:push`)
3. **Add Database Query Helpers** (`server/db.ts`)
4. **Add tRPC Procedures** (`server/routers.ts`)
5. **Create Frontend Component** (`client/src/components/`)
6. **Add Component to Page** (`client/src/pages/`)
7. **Write Tests** (`server/*.test.ts`)

Full example: See [CODE_EXAMPLES.md]

Common Patterns

- **Query Procedures:** Read-only operations
- **Mutation Procedures:** Write operations
- **Admin-Only Procedures:** Restricted access
- **Form Components:** React Hook Form + Zod
- **List Components:** Pagination and filtering
- **Error Handling:** tRPC errors and toast notifications
- **Testing:** Vitest unit and integration tests

Configuration Guide

Environment Variables

Development (.env.local):

```
DATABASE_URL=postgresql://...
VITE_APP_ID=your_app_id
OAUTH_SERVER_URL=https://api.manus.im
JWT_SECRET=your_jwt_secret_min_32_chars
OPENAI_API_KEY=sk-...
TWILIO_ACCOUNT_SID=...
```

Production: Set all variables in Manus UI or deployment platform

Database Configuration

- **Type:** PostgreSQL 14+
- **Connection Pooling:** pgBouncer (25 connections)
- **Backups:** Automated daily
- **Restore:** Tested weekly

External Services

- **OpenAI:** GPT-4 model
- **Twilio:** WhatsApp messaging
- **SendGrid:** Email delivery
- **AWS S3:** File storage
- **Redis:** Caching and sessions

Team Directory

Project Leadership

Role	Name	Email	Phone
Executive Sponsor	[TBD]	[TBD]	[TBD]
Project Lead	[TBD]	[TBD]	[TBD]
Product Manager	[TBD]	[TBD]	[TBD]

Development Team

Role	Name	Email	Expertise
Tech Lead	[TBD]	[TBD]	Architecture, Backend
Senior Developer	[TBD]	[TBD]	Full-Stack, Database
Developer (Frontend)	[TBD]	[TBD]	Frontend, UI/UX
Developer (Backend)	[TBD]	[TBD]	Backend, APIs

Operations & Support

Role	Name	Email	Expertise
DevOps Engineer	[TBD]	[TBD]	Infrastructure, Deployment
QA Engineer	[TBD]	[TBD]	Testing, Quality Assurance
Technical Writer	[TBD]	[TBD]	Documentation

Full Team Directory: See TEAM.md

Communication & Escalation

Slack Channels

- **#aglc-crm-general** - General discussions
- **#aglc-crm-dev** - Development discussions
- **#aglc-crm-support** - Support and issues
- **#aglc-crm-announcements** - Project announcements
- **#aglc-crm-standups** - Daily standups

Meetings

- **Daily Standup:** 9:30 AM (15 min)
- **Weekly Planning:** Monday 10 AM (1 hour)

- **Sprint Review:** Friday 4 PM (1 hour)
- **Stakeholder Update:** Friday 3 PM (30 min)

Escalation Path

1. Report to Tech Lead or Project Lead
2. If not resolved in 2 hours, escalate to Product Manager
3. If critical, escalate to Project Lead
4. If business-critical, escalate to Executive Sponsor

Key Contacts

Emergency Contacts

Critical Production Issue:

- On-Call: [TBD]
- Slack: @on-call
- Email: oncall@aglc-crm.com

Security Incident:

- Security Team: [TBD]
- Email: security@aglc-crm.com

Data Loss/Disaster:

- DevOps Lead: [TBD]
- Email: devops@aglc-crm.com

How to Use This Documentation

For First-Time Readers

1. Start with this Master Index
2. Read the Executive Summary
3. Review the Architecture Overview
4. Check your role-specific section
5. Dive into detailed documentation

For Daily Reference

- **Quick Lookup:** Use Quick Reference PDF
- **Configuration:** Use Configuration Guide
- **Code Patterns:** Use Code Examples
- **Team Info:** Use Team Directory
- **Progress Tracking:** Use TODO List and Status

For Specific Tasks

- **Adding a Feature:** See Code Examples
- **Deploying:** See Configuration Guide
- **Troubleshooting:** See Quick Reference
- **Team Communication:** See Team Directory
- **Project Planning:** See Implementation Checklist

Documentation Maintenance

Update Schedule

- **Weekly:** TODO List and STATUS.md
- **Bi-weekly:** CHECKLIST.md

- **Monthly:** CODE_EXAMPLES.md and CONFIGURATION.md
- **Quarterly:** Strategic documents and PDFs

Version Control

All documentation is version controlled in Git. Use meaningful commit messages:

```
git commit -m "docs: update Phase 1 checklist with Week 3 progress"
git commit -m "docs: add new code example for case notes feature"
git commit -m "docs: update team directory with new hires"
```

Feedback & Improvements

To suggest improvements to documentation:

1. Create an issue in GitHub
2. Tag with `documentation` label
3. Include specific suggestions
4. Reference the affected document

Frequently Asked Questions

Q: Where do I start?
A: Find your role in Quick Navigation and follow the recommended reading order.

Q: How do I add a new feature?
A: See CODE_EXAMPLES.md for a complete step-by-step guide.

Q: How do I deploy to production?
A: See CONFIGURATION.md for deployment procedures.

Q: Who do I contact for help?
A: See Team Directory for contact information.

Q: What's the current project status?
A: See Project Status for the latest updates.

Q: When is Phase 1 starting?
A: Phase 1 starts upon stakeholder approval, estimated March 19, 2026.

Q: What's the budget for Phase 1?
A: $120,500 for 8 weeks of development.

Q: How do I track progress?
A: Use TODO List and STATUS.md.

Document Information

Document Type: Master Index
Version: 1.0
Date: March 12, 2026
Author: Manus AI
Distribution: All team members, stakeholders
Confidentiality: Internal Use Only
Last Updated: March 12, 2026
Next Update: March 19, 2026 (Weekly)

Acknowledgments

This comprehensive documentation package was created to ensure successful implementation of the AGLC Law Firm CRM. It represents a complete knowledge transfer system covering architecture, implementation, operations, and team coordination.
